Operations and is not part of the Official Record**

BEST AVAILABLE IMAGES

Defective images within this document are accurate representations of the original documents submitted by the applicant.

Defects in the images include but are not limited to the items checked:

- ☐ **BLACK BORDERS**
- ☐ **IMAGE CUT OFF AT TOP, BOTTOM OR SIDES**
- ☐ **FADED TEXT OR DRAWING**
- ☐ **BLURRED OR ILLEGIBLE TEXT OR DRAWING**
- ☐ **SKEWED/SLANTED IMAGES**
- ☐ **COLOR OR BLACK AND WHITE PHOTOGRAPHS**
- ☐ **GRAY SCALE DOCUMENTS**
- ☐ **LINES OR MARKS ON ORIGINAL DOCUMENT**
- ☐ **REFERENCE(S) OR EXHIBIT(S) SUBMITTED ARE POOR QUALITY**
- ☐ **OTHER:** _____

IMAGES ARE BEST AVAILABLE COPY.

As rescanning these documents will not correct the image problems checked, please do not report these problems to the IFW Image Problem Mailbox.

EXAMINER

HILLERY, NATHAN

ART UNIT PAPER NUMBER

2176

DATE MAILED: 08/25/2004

Please find below and/or attached an Office communication concerning this application or proceeding.

5

Office Action Summary	Application No. 09/922,745	Applicant(s) D'AMICO, MARIO	
	Examiner Nathan Hillery	Art Unit 2176	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
 - If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
 - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
 - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 30 August 2002.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-15 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1-15 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☒ The drawing(s) filed on 07 August 2002 is/are: a) ☒ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
2. ☐ Certified copies of the priority documents have been received in Application No. _____.
3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).
- * See the attached detailed Office action for a list of the certified copies not received.

Art Unit: 2176

DETAILED ACTION

1. This action is responsive to communications: Miscellaneous

Communication filed on 8/30/04.

2. Claims 1 – 15 are pending in the case. Claims 1, 13, and 15 are independent.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 1, 2, 5 – 15 are rejected under 35 U.S.C. 103(a) as being unpatentable over Eintracht et al. (US 6687878 B1) and further in view of Rodkin et al. (US 6687878 B1).

5. **Regarding independent claim 1**, Eintracht et al. teach that *the present invention is a system for collaborative document annotation whereby notes or annotations associated with a document are stored on a web server. Examples of documents include, but are not limited to, images, text documents or documents expressed in a page description language such as Postscript or Adobe PDF. In addition, each document may contain more than one page, wherein each page is annotated independently of the other. The documents and associated annotations are treated independently from each other. Separate data structures are created for the documents and for the associated annotations*

Art Unit: 2176

thus permitting their independent management (Column 6, lines 32 – 43), which provide that **a. a first set of data causing the browser to render on the display a fixed representation of a document; b. a second set of data which causes the web browser to make available to the user at least one annotation tool donating to the web browser an annotation functionality, said annotation tool permitting a user to annotate the fixed representation of the document by invocation of one or more methods of the document object model that manipulate HTML.** Eintracht et al. do not explicitly teach **manipulating HTML**. However Rodkin et al. do teach that *the term <a> is HTML which designates a hypertext anchor. The Intelligent Annotator.TM. 520 associates anchor codes and corresponding destination addresses with the matched character strings. In one embodiment, the Intelligent Annotator.TM. 520 inserts anchor codes into the annotated article 415 to identify the corresponding destination address in the destination and expiration database 540. Alternatively, relational database techniques may be used* (Column 16, lines 60 – 67), which provide **at least one method to manipulate HTML**. It would have been obvious to one of ordinary skill in the art at the time of the invention to combine the invention of Eintracht et al. with that of Rodkin et al. because such a combination would provide the users of Eintracht et al. the benefit of *a method and apparatus for automatically providing hypertext anchor codes and destination addresses for a user-readable text file at a content server* (Column 3, lines 60 – 64).

Art Unit: 2176

6. **Regarding dependent claim 2**, Eintracht et al. do not explicitly teach **generating HTML data**. However Rodkin et al. do teach that *the term <a> is HTML which designates a hypertext anchor. The Intelligent Annotator.TM. 520 associates anchor codes and corresponding destination addresses with the matched character strings. In one embodiment, the Intelligent Annotator.TM. 520 inserts anchor codes into the annotated article 415 to identify the corresponding destination address in the destination and expiration database 540. Alternatively, relational database techniques may be used (Column 16, lines 60 – 67), which provide that use of the tool for annotating the fixed representation of the document invokes at least one method of the object model for generating HTML data.* It would have been obvious to one of ordinary skill in the art at the time of the invention to combine the invention of Eintracht et al. with that of Rodkin et al. because such a combination would provide the users of Eintracht et al. the benefit of *a method and apparatus for automatically providing hypertext anchor codes and destination addresses for a user-readable text file at a content server (Column 3, lines 60 – 64).*

7. **Regarding dependent claim 5**, Eintracht et al. teach that *an annotation or note is a portion of text or a graphical drawing that is associated with a specific location in a document. The terms annotation and note are intended to mean the same thing and are used interchangeably throughout this document. The location associated with a note in the document is called a Note Anchor and is kept separate from the annotation data itself. Once a note is created, its anchor point can be changed by the user. The note anchor is expressed in terms of (X,*

Art Unit: 2176

Y) coordinates in the annotated page of a document. A note anchor may be set to a coordinate value of (0, 0) if the document associated with the note is a logical folder. Note that the annotation can be displayed within its own window or can be layered on top of the displayed document. The first option is used in the case of text only annotations. The second option is used for mixed text and graphical annotations (Column 7, line 55 – Column 8, line 3), which provide that

use of the annotation tool invokes one or more methods of the object model that manipulate HTML to generate HTML annotation data constituting a layer to the fixed representation of the document.

8. **Regarding dependent claim 6**, Eintracht et al. teach that *at the client side, the client application layers the annotations over the image (or document) in accordance with the coordinates of each (Column 2, lines 53 – 55), which provide that*

the HTML annotation data includes an annotation image element and coordinates information specifying the position of the annotation image element in the fixed representation of the document.

9. **Regarding dependent claims 7 – 9**, Eintracht et al. teach that *each record in the Notes Table of the Notes Database 60 utilizes the unique Note Serial Number for the key index. Each record in the database comprises the following information: Note Document ID, Note Contents (text or graphical information), Note Anchor coordinates, Note Time Stamp and Note Owner ID (Column 10, lines 56 – 61), which provide that*

the HTML annotation data includes identity data identifying an author of the annotation data, the

Art Unit: 2176

HTML annotation data includes a data stamp, and the HTML annotation data includes a time stamp.

10. **Regarding dependent claims 10 – 12**, Eintracht et al. teach that *the document may contain one or more pages. An example for a single page document is a TIFF file format image. An example of a multi-page document is an Adobe Portable Document Format (PDF) document* (Column 12, lines 50 – 53), which provide that **the document includes multiple pages, that the fixed representation of the document is a representation of the document in printed form (PDF), and that the first set of data includes data in a format selected in the group consisting of GIF, JPEG, TIFF representing the document in printed form.**

11. **Regarding independent claim 13**, the claim incorporates substantially similar subject matter as claims 1 and 5, and is rejected along the same rationale. Further, regarding the added limitation, **appending the HTML annotation data to the file**, Eintracht et al. teach that *immediately thereafter, the client issues a request to retrieve the notes associated with the image, if there are any, from the server (step 124). The URL that is supplied to the server to retrieve the notes is the same URL corresponds to the underlying document (image) but having a suffix of '.backslash.notes' appended to it. Upon receiving the appended URL, the server searches the Notes Database 60 (FIG. 3) for the specified document using the URL as the key for searching (step 126). Once found, the server filters the notes so as to supply only those notes that the*

Art Unit: 2176

requesting client has permission to view (step 128). (Column 13, line 66 – Column 14, line 9).

12. **Regarding dependent claim 14**, Eintracht et al. teach that *the Notes Server 58 functions to provide the central document and note management features. Normally the Notes Server functions in conjunction with a web server 54. It may access documents that reside in its own file system or that reside on remote file servers 62 located within the local area network (Column 8, lines 33 – 38) and that note Events are exchanged between the server and the clients. Notes Clients forward to the Notes Server requests to view, modify, create or delete notes. In response, the Notes Server Updates the clients with an up to date note list per document (Column 9, lines 16 – 20), which provide for establishing a communication with a remote server and forwarding to the remote server the file to which is appended the HTML annotation data.*

13. **Regarding independent claim 15**, the claim incorporates substantially similar subject matter as claim 1, and is rejected along the same rationale.

14. Claims 3 and 4 rejected under 35 U.S.C. 103(a) as being unpatentable over Eintracht et al. (US 6687878 B1) and Rodkin et al. (US 6687878 B1) as applied to claims 1, 2, 5 – 15 above, and further in view of Zhu (cited by App).

15. **Regarding dependent claims 3 and 4**, neither Eintracht et al. nor Rodkin et al. explicitly teach **a pen tool, a highlight tool and a notes tool**. However, Zhu teaches that *referring to FIG. 2, when the user starts the overlay program, a window is created and a default object type, such as the pen type, is provided.*

Art Unit: 2176

*The user can use the pen, the movement of which is controlled via the mouse, to move around the screen and click on icons. The user can click on an icon to import one or more images and display them on the screen 24. The user can create annotation objects on the images with the pen (Column 5, lines 19 – 26) and that the user may create annotation objects by first selecting the annotation object type (or use the default annotation object type) to annotate over the image. Annotation object types include highlights, boxes, circles, lines, arrows, text input, and etc. (Column 5, lines 44 – 48), which provide that **said second set of data causes the web browser to make available to the user a plurality of annotation tools, said annotation tools being independently selectable by the user for annotating the fixed representation of the document**, and that **the plurality of annotation tools include a pen tool, a highlight tool and a notes tool (text input)**. It would have been obvious to one of ordinary skill in the art at the time of the invention to combine the invention of Zhu with that of Eintracht et al. and Rodkin et al. because such a combination would provide the users of Eintracht et al. and Rodkin et al. the benefit of *a method for organizing and accessing screen presentation to a computer display* (Column 2, lines 49 – 50).*

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Nathan Hillery whose telephone number is (703) 305-4502. The examiner can normally be reached on M - F, 8:30 a.m. - 5:00 p.m..

Art Unit: 2176

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Joseph H. Feild can be reached on (703) 305-9792. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
